

BOIL ADVISORY

CEDRIC B. GLOVER, MAYOR

**Shreveport Water System
PWS ID# 1017031
Caddo Parish, Louisiana**

**FIELD OPERATIONS
318-673-7600**

June 19, 2012

The Shreveport Water System will be repairing a water main in your area, beginning at 5:30 p.m. today. As a result, water service to the following consumers will be turned off for approximately 5 to 6 hours:

***State Building 1525 Fairfield, Circle K 1417 Fairfield, 800 & 900
Blocks of Jordan which Includes St. John Berchmans
Church/School and First Presbyterian Church/Daycare***

When your service is restored, the water supplied to you by our water distribution system within this limited area is of questionable microbiological quality. Lab tests will be conducted to verify the safety of the water.

Therefore, as a precaution, the Shreveport Water System is issuing a VOLUNTARY BOIL ADVISORY effective whenever the water service is restored. This BOIL ADVISORY is to remain in effect until rescinded by the Shreveport Water System.

It is recommended that all consumers disinfect their water before consuming it (including fountain drinks), making ice, brushing teeth, or using it for food preparation or rinsing of foods by the following means:

Boil water for one (1) *full* minute in a clean container. The one minute starts after the water has been brought to a rolling boil. (The flat taste can be eliminated by shaking the water in a clean bottle or pouring it from one clean container to another)

Again, if you are in the affected area, please be sure to disinfect your own water prior to consumption until you have been advised otherwise.

The water within this limited area will be tested as soon as repairs are complete. When satisfactory test results are obtained, the Shreveport Water Supply will then rescind the Boil Advisory and notify customers the water has been deemed safe.

**Water Supply Representative: James Kennedy
Title: Superintendent, Field Operations**
